

# CIBC RUN FOR THE CURE

## Multi-Site Teams

### Are you a Multi-Site Team?

A Multi-Site Team (MST) is a great way to engage colleagues, friends and family who cannot all be at one location! MSTs register in two or more locations with at least ten participants in each location.

MSTs are important contributors to the CIBC Run for the Cure. In 2016, MSTs made up 12.5% of all fundraising teams and raised nearly **\$3 million!**

### Why participate as a Multi-Site Team?

1. Multiple locations make it easy for everyone to participate
2. Show support for your fellow Canadians affected by breast cancer, including your colleagues!
3. Be a part of your communities where you do business.

### Get your MST started!

1. Choose your Run locations and set your fundraising goals.
2. Invite your colleagues to participate.
3. Start fundraising!

### About the CIBC Run for the Cure

The CIBC Run for the Cure is the largest single day, volunteer-led event in the support of creating a future without breast cancer. The event has nearly 100,000 participants and is set to raise \$15 million this year.

The funds raised are invested by the Canadian Cancer Society in the most promising breast cancer research in prevention, diagnosis, and treatment and care, as well as funding Canada's leading breast cancer patient support network.
